

## Spring cleaning by Yeatts Inc.

Spring has arrived and so have all the insects, pollen, and of course the never-ending battle with dust. Vacuum your carpets and rugs to remove dust, pollen, and any embedded insects. Rotate all area rugs and if applicable vacuum the felt side of any underlays. Remember to use both sides of your two-sided rugs such as dhurries, rag rugs, or braided rugs! Often a customer will bring one of these rugs into **Yeatts Rug Plant** and one side is filthy and the other side is usually clean. Customers see a label stitched or glued on one side of the rug and believe this is the back side of the rug. These types of rugs are designed to be used on both sides. **Yeatts Inc.** recommends that you clean upholstery once a year. Our cleaning process will also eliminate simple odors such as human and animal hair oil odors, vomit odors, and nicotine odors. We also recommend protecting your upholstery after each cleaning. Every new, fabric upholstered item is treated with fabric protector. However, just as new carpeting, the invisible protectant will chip off the upholstered fabric over time. Protecting your upholstery after cleaning isn't very expensive, and it can make all the difference when a sudden accident occurs. If it has been over a year, then call to schedule carpet cleaning for rooms frequently used by family and pets. Our company has the superior equipment, cleaning solutions, and skills needed to clean carpets professionally. While our technicians are at your home, request our excellent mattress cleaning service. Make sure you have a set of **Y.E.S. spotters** to treat accidental spills between cleanings because pet stains, food, and drink spills can easily stain any fabric if left untreated.

## How to select carpet before you buy.

Selecting carpet for a room is much more than looking for a desired color or pattern. There are other considerations such as the type of fiber and the quality of construction of both the carpet and underlaying. You may find the perfect carpet for a room and then regret the decision years later. For instance, polyester fiber cleans very well. However, any hair or lint that attaches to polyester almost has to be pulled off by hand. Regardless the quality of carpet and all the various warranties detailed by the manufacturer, it means nothing if cheap underlaying is used. Also the difference in price between cheap and superior underlaying is reasonable unlike other consumer goods. Always contact a skilled carpet retailer as they would know the latest and best carpeting.
