

Thanks for 40 years!

Thank you for 40 years of customer loyalty! **Yeatts Inc.** is celebrating 40 years of providing superior fabric cleaning service. The company founded by William J. Yeatts and Bonnie Yeatts has steadily moved on. So many of our regular customers throughout the decades have witnessed the changes at our company. From the creation of products and services to making machinery, equipment, and tools in-house, our loyal customers have made the greatest contribution to our success. *"We could never thank the customers enough,"* stated **Yeatts Inc.** C.O.O. Chris Munden. The amount of referrals given by satisfied customers to future customers more than exceeds results attained via phonebooks, radio, websites, and now social media advertisement. We thank all of our customers for helping make **Yeatts Inc.** a vertically integrated company and leader in the fabric cleaning industry. We also wish to thank all our networking partners, from carpet retailers to real estate owners and agents, throughout the decades. Some major contributors to our success including family, employees, customers, and networking partners are now at peace. When **Yeatts Inc.** technicians use in-house creations such as our drying poles or clean a rug we've cleaned for decades, we remember the individual who made the equipment or who bestowed the rug to a family member. Now **Yeatts Inc.** cleans fabrics for our customers since 1974 and their grandchildren. Our craftsmanship, such as custom-made rugs, is sought after throughout homes and businesses in America.

Mattress Cleaning by Yeatts Inc.

Yeatts Inc. has cleaned mattresses for allergy or asthma sufferers throughout the decades. A great advancement in the fabric cleaning industry occurred when **MasterBlend®** piloted the way by creating cleaning solutions designed specifically for allergy or asthma sufferers. Our thorough cleaning process using **MasterBlend®** Responsible Care™ Products eliminates bacteria, hard debris, and most stains. Another important detail to mention is that our cleaning process removes dead skin cells. Dead skin cells are the main diet for dust mites. Following cleaning, we apply **MasterBlend®** Allergy Relief Treatment for additional protection. Visit the coupons page for a special on mattress cleaning this Summer.
